

## Relief Costs in the Town of Raymond

Relief Expenditures taken from the Auditor's report covering the years 1929 to 1936 inclusive:

Year	Expended on Relief	Old Age Pensions and Mother's Allowance	Relief Refunded by Provincial Government
1929	\$ 675.75	\$ 930.00	Nil
1930	1,358.79	1,522.16	Nil
1931	2,169.52	1,123.93	Nil
1932	1,639.35	1,612.41	Nil
1933	1,749.36	1,390.71	Nil
1934	2,024.27	1,206.92	Nil
1935	2,607.51	2,192.93	426.60
1936	5,696.83	66.22	1,050.61

Relief increase of 1936 over 1931 is 162 per cent.

Relief increase of 1936 over 1935 is 118 per cent.

Total Town Levy in 1936 was \$22,000.00. Net relief part is \$5,696.00 less \$1,050.00 or 21 per cent. In other words 21c out of each dollar levied went for relief last year.

Amount of taxes collected in 1936 \$18,869.00. The net relief paid out of taxes collected was 24 per cent; or 24c out of each dollar collected went for relief.

Out of the \$5,696 paid for relief, \$3,308 was contributed 100 per cent by the taxpayer. Of the \$2,387 contributed by the taxpayer there is a refund of 58 per cent or \$1,384, out of which \$1,050 has been received thus far.

Number of families or parts families on relief in 1936 was 40.

M. T. KING,  
Chairman of Health and Relief Committee.

### NEWS NOTES

The east and west coulees south of town had the dams removed Friday and Saturday to safeguard the big Town dams.

Red Deer schools were closed for a week because of flu and measles which cuts down the attendance so badly.

Barnwell is asking why their highway hasn't been opened up for the past month. When the wind piles up the snow like it did Tuesday and Tuesday night there is little that can be done to clear roads anywhere.

Raymond was deluged with reading Wednesday evening when Tuesday's Lethbridge Herald, and Calgary Albertans for Tuesday and Wednesday arrived on the C. P. R.

### YOU CAN MASTER LIFE

"If the record of actual human experience indicates that the satisfactions accruing from a career of crookedness are usually far less permanent than those accruing from a career of integrity, then the wise course of action is clearly apparent. Fortunately, there is an abundance of evidence on this crucial point. The most conclusive portions of it are offered curiously enough, by individuals who have actually experimented with the lower levels of life, and who have found that the satisfactions available there eventually prove distinctly disappointing." "You Can Master Life."—Macmillan.

### RAYMOND LOCAL A. T. A. NEWS

The Raymond local met at the High School on Monday, February 8 at 4:30. The meeting was purely of a business nature. Mr. Merrill was chosen as T. W. representative; Mr. Gibb and Mr. Williams, of Welling, as delegates to the Easter Convention.

The next meeting will be held at the home of Mr. Hicken on March 8 at 8 o'clock.

### PICTURE BUTTE NEWS

We thought that perhaps our friends and acquaintances in Raymond might be glad to know that we have come out of a month's being "snowed in" very well, and with few exceptions no sickness.

Monday evening of last week saw the first real ward party. Although a driving blizzard was in progress and no teams or cars travelled, practically every grown member of the ward and numerous others were present. The big event of the evening's entertainment and which afforded merriment for days after was the reading of the "Picture Butte Gazette of 1950" by Mrs. Ernest Bennion.

On the same evening Mrs. Jack Simpson entertained at bridge.

Last week end three or four car loads of ward members attended conference at Lethbridge despite the bad roads and enjoyed the inspired talks from Pres. Rufus K. Hardy, T. Geo. Wood and others.

At the Sunday School Union meeting held after the Sunday afternoon session when the roll was taken it was found that there were as many officers and teachers present from Picture Butte as from Lethbridge, which caused Elder Elton to remark from the stand "The baby is as big as its mother."

Word has been received from Melba Orgill who is attending school and expects to graduate in the spring in Mesa, Arizona of the first snow fall in 40 years. Many there were who had never seen snow, and the city fairly went wild, turning out for a huge snow ball fight.

Mrs. Marion Brown moved to Lethbridge this week where her young son has been ill for nearly a month with aftereffects of an operation for Mastoids. He is getting along nicely. Mr. Brown is watch man at the factory and will board at the home of Wit Hague.

Mrs. Eva Salmon has been sick with an infection of the ear. Her youngest son is just recovering from a serious attack of measles.

Mr. Gladys McCue has been ill for the past two weeks with mumps.

Mrs. C. Smith has taken over the management of the "Checker Board" Cafe.

Lyle Piegrass has commenced his labors on a two years local mission. It is felt that much good will result as many of the people have not heard the gospel & some appear quite interested. His companion is William Orvis a recent convert from Picture Butte who has made preparations for the Ministry.

The "girls-club" will meet at the home of Shirley Bennion on Thursday. Plans are being made for a Valentine dance.

## 270 Voters At Polls Monday

The cold weather Monday cut down the Municipal vote to very small proportions. Out of a registration of nearly 900 for Council and over 1,000 for School Board, only 270 citizens braved the rigors of the weather to cast their votes.

The three old Town Councilmen were returned for another two year term: viz. Wm. Jensen, M. T. King and Lloyd McPhee. These three polling the highest votes. T. T. Mendenhall and Junius L. Anderson were the runners up.

Chairman C. F. Tollestrup and D. G. Selman, School Trusts seeking re-election were successful again. Robt. J. Fansett was runner up here.

Voters were also asked to express an opinion respecting placing of a Swimming Pool. These votes were as follows:

The Site near High School, 102; Present site reconstructed, 103; Coulee site to the east of Town 28 votes.

### STRAW VOTE AT PUBLIC SCHOOL

Principal J. O. Hicken held a straw vote in the Public School on Monday on the Swimming Pool question, with the pupils from Grades 3 to 7, ages 9 to 15 years. The three highest grades had the advantages of the High School site explained to them the other grades voting without any remarks. The results of the voting was as follows:

Total votes cast, 295; High School site, 212; Coulee site, 43; Old site reconstructed, 30. The results of this school vote are quite illuminating and express the opinions of the pool's best customers.

## Warmer Weather Arrived Tuesday

After 48 days of winter weather, the greater part of which was very severe, a welcome moderation occurred Monday night and Tuesday, Monday morning was very cold, being 33 below, but the middle of the day was pleasant. About 4 p.m. the mercury started a nose dive, and at 6 p.m. was 20 below. It commenced climbing again and by 10 p.m. was up again to 2 below. It remained warm all day Tuesday and during Wednesday it reached 40 above, and some melting was taking place. The real Chinook wind was not working at dark Wednesday evening, but after what we have had, it was really very welcome and enjoyable.

The high wind Tuesday and of winter set in.

Tuesday night drifted the snow into cuts in roads again and made motor travel except on streets, and only main street, at that, completely out of the question. Even train service was halted and slowed up. The Cardston train which usually arrives Tuesday about noon did not get in until late Wednesday afternoon, and the Greyhound bus has not made a trip since Monday night. The wind reached the proportions of a gale in the early hours of Wednesday morning just before it commenced to go down. Wednesday was one of the most pleasant days we have had since early in December before the snows and cold of winter set in.

## News Notes

Don Merrill had to go home Wednesday, and nurse a case of flu and bad cold for a day or two.

Harry Christie, local C.P.R. agent was forced to lay off work for a few days this week because of flu.

A huge airliner dived into San Francisco Bay Tuesday evening, after it had phoned for landing instructions and had circled again to approach the landing field properly. It was feared the eight passengers and crew of three had all lost their lives.

Geo. H. Brewerton has been in Spokane on business the past week.

Premier Aberhart states that if other provinces send delegates to the Coronation, Alberta will do likewise, but there will be plenty of time to name the person later on.

The Sugar Co. shipped out a trainload of ten cars of sugar Wednesday when the C. P. R. train returned to Lethbridge. This train should have arrived Tuesday but the drifting snow held it up until Wednesday.

## Large Crowd At Ice Carnival

Young and old had a great time at the Raymond Ice Carnival Wednesday evening. It was the first one held for a number of years, and with the milder weather, which arrived just in time for it, a big crowd was on hand to watch and participate.

Races were held for young and old, barrel jumping, and stunts of every kind, and general skating, all was climaxed by a game of Broomball, in which the participants did everything with the ball except put it in the goal where it was supposed to go. Some of them even got so ambitious they heaved the ball in the air higher than the lights at the rink.

In the drawing for door prizes, Eldon Garner won the large box of chocolates and went home smiling over his good luck.

The fun kept up until after 11 p.m. and the sponsors are to be congratulated for the splendid success of the evening, and lovers of skating are hoping this is but the beginning of many such evenings.

## Local High Trims Lethbridge Collegiate

### WINTER ROADS BIG PROBLEM FOR PROVINCE

Keeping of winter roads open in this province is again proving a problem for the Public Works Department. In the south, particularly, where the snow has drifted to considerable depth in some parts and mixed with the drifted soil, the situation has been serious.

While two snow plows were out into service this season by the Public Works Department, these had to be taken out of commission temporarily, owing to the exceptional snowfall conditions. The Department returned to the use of some old equipment, which it had built itself.

It was found that the fast new plows were not giving satisfactory service, on account of the exceptional conditions that were encountered. While the new trucks operated satisfactorily, it was not so with the new sharp pointed plows.

Officials of the Alberta Motor Association are drawing the department's attention to snow plow operations in Montana where a rotary plow has managed to keep the roads open despite the fact that they had drifted badly owing to the high winds. The plow throws the snow 50 feet to one side, clearing the grade, and is able to work its way through any drift.

In Ontario, some 4,000 miles of winter roads are kept open through having fast trucks in operation, with mechanical spreaders and conveniently located piles of abrasives. Materials used to make winter driving safe are sand, cinders and stone chips, mixed with common salt.

The salt prevents the stock piles from freezing and when the sand is scattered on the highway, the salt melts the ice thereby imbedding the abrasives in the slippery surface. Without the salt the sand and cinders would be dissipated by wind and traffic.

### BUILDING REVIVAL AWAITS MORE GENERAL ACTIVITY

Stimulation of building in Canada requires something more than the cheap money made available under the Dominion Housing Act, in the opinion of W. A. McKague, secretary of the Canadian Society of Cost Accountants and Industrial Engineers. Writing in the current issue of The Canadian Chartered Accountant, he says: "If we want building to return to its former scale then we will have to rebuild confidence by a long and painful process of paying as we go and producing commodities on such a scale as will provide not only for the commodities we need to import but also for interest on investments already made here. At the best, foreign capital offers no early help in Canadian development."

The local High School took sweet revenge on the Lethbridge Collegiate for their defeat at the hands of that team on the Collegiate floor recently. The game was a sizzling affair from start to finish. Three times during the contest the score was even, and fans were wild with enthusiasm as the teams fought on for supremacy and victory.

Stone led the local hoopsters with 14, and Bud Brewerton notched 12. Dogterom of Lethbridge, flashy centre was the outstanding player for Lethbridge, getting the tip off and being the pivot man of the team. Whenever these two aggregations get together, fans are assured of a fast and interesting game.

Shiptham and Hergie had the whistles for the game.

Lineup and individual scores was as follows:

Collegiate—Sherwood 8, Murdoch 2, Phillips, Dogterom 10, Campbell, Sloan 6, Walker 8, O'Meara, Wood, Total 34.

Raymond—Stone 14, Boyson, Ehler, Selman 6, Hicken 4, Brewerton 12, Nalder 4, Larson, Total 40.

Lethbridge juniors won over Raymond 27-12 in a preliminary game.

to rebuild confidence by a long and painful process of paying as we go and producing commodities on such a scale as will provide not only for the commodities we need to import but also for interest on investments already made here. At the best, foreign capital offers no early help in Canadian development."

Mr. McKague points out that the increase in other activity must continue to the point where space becomes scarce and rental values increase before there can be an economic basis for new building. At present rents the net return to a landlord, after provision is made for interest, depreciation and taxes, does not come near the return he can get on more marketable securities. Therefore, there is no inducement to him to invest money in new construction.

Another hindrance to new construction is seen in the wage rates prescribed by provincial industrial codes. "The codes," says Mr. McKague, "may be social ideals, but from the very fact that they curtail rather than expand employment, they are injurious measures under present conditions."

## John Deere School Well Attended

The John Deere Power School showed the events leading up to on Monday was exceptionally well attended, especially in view of the cold weather. J. LeRoy Anderson, the local John Deere Agent was at the Capitol Theatre to welcome his guests and to introduce the visitors, viz. Ward and Wm. MacDonald, blockmen of the Company, and Mr. J. Zirk, machine operator.

The programme consisted of three features "Her Husband's Choice," film centering around a marriage, but containing splendid illustrations of John Deere tractor construction and simplicity and views of the various lines of John Deere implements. The second picture was "The Blacksmith's Gift," and

the fashioning of the first steel plow by John Deere, back in 1837. The concluding part of the picture showed the growth and expansion of the John Deere Company. The concluding film was "What's New in Machinery" and showed recent developments in tillage implements.

Following the showing in the Theatre, Harold Evenson's registration card was drawn entitling him to a credit on any John Deere purchase.

The films were interesting, educational, and greatly appreciated by the audience, and many compliments were paid the sponsors.

SATISFIED FAILURES

If it is too late for some people to make a fresh start to make a financial or personal success of their lives. It may be, for some are past ninety.

The writer is acquainted with the story of a man who lost all at 79. At 79 and a half he started selling candy from a basket at his feet on a street corner. At 83 he is again the head of a well-financed candy company.

The writer knows a lady of charm, an interesting personality, a brilliant conversationalist who doesn't let her brilliance make you feel your dullness. She is 81. No, it doesn't pay to give up—that is, unless you are thru the eighties and perhaps not then.

But, as was intimated previously in this column, we do need to purge our minds of the idea that we are good enough—that we are all we may be. There can be no further progress in any life until that is acknowledged.

A man who has made a hundred thousand dollars and acquired a college education may still be as far from his possibilities as the village fool doting on the general-store steps.

Leonardo de Vinci (1425-1519) is a good illustration of this point. Draper said of him:

"Unlike Bacon, who was ignorant of mathematics, and even disparaged them, he points out their supreme advantage. Seven years after the voyage of Columbus, this great man—great at once as an artist-mathematician, and engineer—gave a clear exposition of the theory of forces obliquely applied on a lever; a few years later he was well acquainted with the earth's annual motion. He knew the

laws of friction and the principle of virtual velocities; he described the camera obscura, understood aerial perspective, the nature of colored shadows, the use of the iris, and the effects of the duration of visible impressions on the eye. He wrote well on fortifications, anticipated Castelli on hydraulics, occupied himself with the fall of bodies on the hypothesis of the earth's rotation, treated of the times of descent along inclined planes, and circular areas, and of the nature of machines. He considered with singular clearness, respiration and combustion, and foreshadowed one of the great hypothesis of geology, the elevation of continents."

Knowing all this and very much more, da Vinci would have fallen far short of his personal possibilities had he not given the world the inspiration conveyed by his brush in "The Last Supper."

Many people have been lifted out of their baser selves by contemplating copies of that masterpiece. One artist worked for six years on his copy.

"Leonardo's talent is summed up by saying that, in point of time, he taught Michelangelo force, Raphael, beauty and other artists grace."

Leonardo de Vinci would have been a failure—for him—had he expressed any less of what was in him. Naturally the question which arises is: "Are we doing the best by our age according to the talents, tendencies and opportunities entrusted to us?"

### YOUTH GETS A BREAK

The young men and women of Alberta must view with gladness the summoning of Hon. Mr. Tannor and Hon. Mr. Low to the provincial cabinet. It means much to have some of our disciplined young and forward-looking minds called to executive participations in public affairs. It may be a painfully frank observation, but the fact remains that much of our distress can be directly traced to the stodgy, stuffy thinking of those who were purely and simply creatures and perpetrators of machine politics. Let us hope that this particular viciousness of the past has gone.

These young men have spent

their lives industriously, have kept the wheels of their intellects turning constantly, have read and thought and toiled in the communities where they made their homes. In those centres they are both admired and respected. It may be objected that they are not business men in the common acceptance of that term. Looking about us one hesitates to say that they are any the worse for that. It may be stated, too, that they come from small communities, but no one would pretend to deny that the best Canadian brains have come from such places in the past.

In the very nature of things, it is not likely that young men like these, Canadian and Albertan in their every aspiration, will excel every standard hitherto set by the Hoadleys, the Reids, the Brownlees, and the Lymburns whom we suffered to govern us for fifteen years. There can be only one serious answer and it is not even necessary to suggest what it is.

The idea of the Aberhart government, and a sound one it is, seems to be that there shall be

### CANADIANS AND THEIR INDUSTRIES...AND THEIR BANK

### THE HYDRO-ELECTRIC INDUSTRY

Established long before the commercial use of electricity was even dreamed of, the Bank of Montreal has seen the hydro-electric industry rise from its infancy and has provided helpful financial service in every phase of the utilization of water power to industrial and domestic use.

With abundant snow and rainfall on the uplands, and ample reservoir capacity in numerous lakes, Canada is fortunate in having a reliable supply of water power within transmission distance of the principal industrial centres. Only one country, the United States, has a greater total of hydro-electric development.

More than three-quarters of the power equipment used in manufacturing industries in Canada is electric-driven. Seventy per cent. of Canadian homes, urban and rural, are equipped with this "modern servant."

Cheap hydro-electric power has been an important factor in the rapid development of the mining industries. It has been a deciding factor in the refining of base metals from Canadian mines, which only a few years ago was a monopoly of foreign countries. The use of water power has gone hand in hand also with the expansion of the great forest industries of Canada.

The production of hydro-electric power has advanced steadily since the recovery of 1932, reaching new high records each year. The per capita output is exceeded only by that of Norway, yet only one-sixth of the known available water power resources of Canada has been utilized.

Hydro-electric industries and their employees all over Canada find in the Bank of Montreal the convenient and helpful banking service they need.

## WEEKLY LETTER

## WINTER STORAGE OF STOCK WATER

On many irrigated farms the provision of a supply of water for domestic and stock watering purposes is quite inadequate and at this time of the year, when the weather is extremely cold, many of the stock watering reservoirs become frozen to the bottom, due to their shallowness. This necessitates the hauling of water both for domestic use and stock watering.

At this period of the year when it is impossible to remedy the situation it may seem strange to discuss the construction of stock watering ponds. However, on the other hand, this is the season when the lack of an adequate supply of water is most felt. If one is to avoid being in the same position as the man in Arkansas who never mended his leaky roof because he couldn't do it when it rained and when it didn't rain he didn't need to, then it would appear to be a most opportune time to plan and make definite arrangements to have a reservoir built this coming summer that will insure a safe, ample supply of water next winter.

All farmers recognize that the inadequacy of their small stock watering reservoirs is almost exclusively due to the fact that they are not deep enough. The cost of excavating the soil to a suitable depth from a new reservoir or from the existing ones is both expensive and difficult with teams, but the use of power machinery solves the problem quite satisfactorily. A drag line will excavate to a

depth of eleven or twelve feet with ease. If even a part of the present reservoir is dug to this depth there will be enough water to care for all purposes in the winter time, even when the ice is several feet thick.

The ditch officials of the Canadian Pacific Railways have intimated that they are willing to co-operate with the farmers and give them the benefit of the use of one of their drag lines at a price just sufficient to cover the cost of operation. A suitable reservoir, ample for the ordinary farm, can be dug under such circumstances at an estimated cost of about \$50.00. The advantage in the use of the drag line lies in the fact that it will work through water or in mud as well as it will in dry soil, making it quite practical to deepen existing reservoirs.

At the price intimated no irrigation farmer can afford not to have a good winter's supply of water located conveniently to his buildings.

## NEWS NOTES

Melvin King was ill with 'flu the first of the week, being compelled to leave the school room Monday forenoon.

Ray Fairbanks, Smellie Redd, Bert Boyson and Bruce Heggie; LaVonne Meeks, Gwendolyn Hawkins and Mrs. C. A. Hudson were in Lethbridge Saturday evening for the first lesson in a short course in Gymnasium work and teaching being given at the Y.M.C.A. These people will conduct classes in the local gym as they proceed with their course.

### NEWS NOTES

Between measles and flu, they sometimes have as many as 25 students out of one room at school.

It was slippery going Thursday afternoon after the sun had the snow so near melted that it was wet and crunchy.

It is stated that St. Boniface Manitoba may get a \$2,000,000 sugar mill erected there. Tests of beets grown there appear to indicate that the district near St. Boniface is suitable for beet culture.

Mrs. Lela Barker, aged 73 of Magrath, and a pioneer woman of Southern Alberta passed away early Sunday morning in a Lethbridge Hospital, twelve hours after she had a stroke while at the hair dresser's in Magrath. She had always been active in Church work, and leaves her husband and a large family of sons and daughters to mourn her passing.

### FAMILY LIMITATIONS

and the dissemination of sane and safe information thereupon is gaining great headway in the U. S. In November, last, the U. S. publications announced the results of a great straw vote taken on the subject by one of the largest periodicals—and it was found that over 75% were in favor of enlightening the public.

So, in all probability, we shall see within a short period the dream of Margaret Sanger and Dr. Eva Fay fully realized. They have both advocated giving the people full information claiming such enlightening of the public would effectively reduce the fatalities attributed to illegal operations. Dr. Fay has always been very glad to lecture on the subject—and many thousands of our people have been long acquainted with Dr. Fay's Compound—in fact it may always be found in the homes where there is concern over retaining the health and beauty of the better half. The worry of the month, which so easily mars a woman's face and makes her prematurely old, is eliminated by the keeping of Dr. Fay's Compound at hand, because it is absolutely safe to take and most certain in its expected results; and the cost is negligible. If you wish to avoid worrying and be absolutely sure, send by airmail five dollars to the Fay Company, 726 Tav Bldg., Vancouver, B.C. Airmail 25c. extra. You may be in need of Dr. Fay's compound in the future if not now. It will be to your interest to cut this ad. out at once. Refer it to some ready friend. State age when ordering. Not sent C.O.D. Not sold in drug stores. Dr. Fay's booklet on "Family Limitations" 25c. the copy. A very remarkable work.

## Early Spring TRAVEL BARGAINS to EASTERN CANADA

**FOR SALE**—1936 Rogers 10 tube Radio, beautiful cabinet, target tuning, non-stoop-dial. Good as new. Complete with 6 new tubes and Rogers all-wave aerial. Henry J. Sherles

### NEWS NOTES

The Municipal grader & engine worked toward the Welling junction today.

A blizzard blew up from the north today at noon & for a while you could not see clearly for half a block.

Raymond 2nd Ward "M" Men beat the "M" Men of the 1st Ward 52-27 Thursday night. From what we hear these league basketball games are plenty exciting.

High School pupils enjoyed a treat Monday afternoon when the John Deere films were shown there after the showing at the Capitol Theatre.

Town Council will be held Monday evening in connection with the Statutory meeting of the Council when the newly elected members will be sworn in.

When the Bow River at Cammore overflowed its banks people were forced to flee for their lives. Some children were marooned in a skating rink for three hours. Water flowing over the ice at the Lake Minewanka dam is blamed for the flooding.

### NEWS NOTES

Miss Verda Cavanaugh of Calgary is Queen of the Banff Winter Carnival which is in progress there this week.

R. C. Jessup, editor of the Macleod Gazette was elected to the Town Council of Macleod on Monday. Congratulations R.C.

It has been pleasant the past couple of days to put one's head outside without having your breath taken by the cold air that met you.

It was almost seven o'clock when the Greyhound arrived here Monday night. It was way late getting in from Cardston that morning too.

Magrath elected Earl P. Tanner for Mayor on Monday last, and Councillors are Tom Carter, Henry Hillmer and Bert Dow. Successful school board candidates were John T. Steele, E. Melvin Ririe and C. C. Spencer.

Chinese and ring necked pheasants in the Magrath district are starving and farmers are asking the Provincial Government to supply feed for them to save their lives. Farmers cannot afford grain for these beautiful birds.

Don Wilde was in from Welling Wednesday with team and sleigh and said you could hardly get through that way.

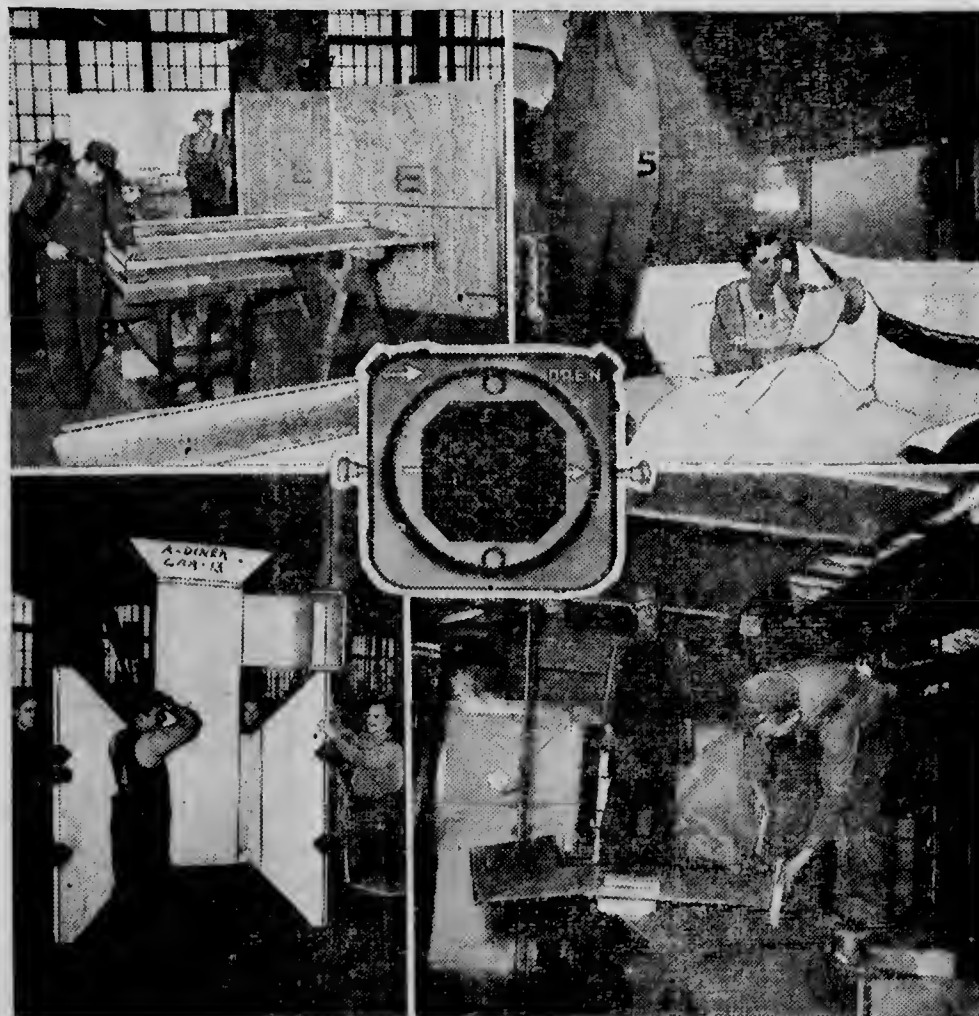

Harold McKean and Heber F. Allen went to Taber Monday to participate in the curling bonspiel there.

In Monday's voting at Cardston, Jos. Low was re-elected Mayor; Councillors elected were John Woslying, L. Cahoon and Wm. Cooper. School Board members are J. M. Workman and Frank Olsen.

Mutt Ralph was late getting his load home Monday, having torn out the rear end of his truck on his trip. "Mutt" is usually so regular that one can almost set their watch by his coming into town, and his delay was noticed by everyone.

In the recent curling bonspiel in Lethbridge, the local rink, with E. J. Gunning, Wm. Anderson, Heber F. Allen and H. McKean, as the skip placed second in the Ellison Mill competition and won a beautiful Hudson Bay Blanket, and in the Hotelmen's Cup, they won a beautiful Silver cake plate. Raymond has received a nice lot of good advertising from these curlers, and we appreciate it.

## Canadian Pacific Extends Air-Conditioned Service

The Canadian Pacific Railway Angus Shops at Montreal are humming with activity these days as the Company continues its comprehensive programme of air-conditioning. In the current year, air-conditioning equipment will be added to 136 cars, including standard sleepers, dining cars, tourist sleepers, parlor cars, and day coaches, and these, in addition to the 130 cars air-conditioned in 1936, will permit a very considerable extension of air-conditioned services throughout the Dominion.

Provision is made by the 1937 programme to provide air-conditioned dining cars on all trains carrying air-conditioned sleepers or parlor cars, besides additional

sleeping and parlor cars for use on trains between Montreal and Quebec, Montreal and Ottawa, Toronto and Ottawa, and trains 39 and 40 between Montreal and Saint John, N.B. Air-conditioning of tourist cars for use on the transcontinental trains between Vancouver and Montreal and Toronto is a new and interesting feature of the 1937 programme. This will supplement last year's services which allowed air-conditioned standard sleepers, compartment-lounge, bedroom and parlor cars to be used on transcontinental trains between Montreal, Toronto, and Vancouver; the Montreal, Toronto, Hamilton, Chicago services; and the night trains between Montreal and Boston. Air-

conditioned sleepers and lounge cars were also provided for the "Mountainliner" service between Chicago, St. Paul, and Vancouver. Some idea of the work connected with air-conditioning is given by the pictures above. Cars are stripped, as in lower right, and insulated to keep out heat, cold, and dust. The pictures at the left show some of the material being placed in the cars. The satisfaction written all over the face of the young lady, in "Lower 5," expresses the public's feelings toward this new type of controlled comfort. In the centre is a close-up of the control equipment, by which, as the arrows indicate, the individual can regulate the volume and direction of the flow of air.
